

ADVANCED MSK ULTRASOUND COURSE LEVEL 2 SHOULDER | 01-02 JUN 2019 | LJUBLJANA

“Registration for our HQ advance Shoulder course is open. We will have great lectures, and improve your skills in shoulder ultrasound examination. This is also great opportunity to visit Slovenia. The course will be held in English/Croatian and having experience with ultrasound is a pre-requisite. “

FACULTY: Zoran Filipović, distributor & trainer | Damir Deković, trainer

SHOULDER | 01-02 JUN 2019

This advanced skills based course focuses on MSK ultrasound of the shoulder. The learning objectives of this course are: learning new scan positions, fine-tune your ultrasound examination skills and improve your anatomic knowledge of the shoulder complex. We will not only have a look at normal anatomy, but also discuss about interesting pathology cases. This course is totally evidence based, and fantastic quality. It is a must-follow for all sonographers who work with shoulder patients.

Topics:

- Ⓢ Biceps brachii ultrasound and clinical examination.
- Ⓢ Rotator interval ultrasound and clinical examination.
- Ⓢ Pathology and clinical reasoning biceps and rotator interval.
